

#	Bucket	Name	Source(s)	Notes
1	Health	Access to high quality primary care	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
2	Health	Access to high quality secondary care	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
3	Health	Access to high quality tertiary care	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
4	Health	Access to high quality residential social care	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
5	Health	Access to high quality community social care	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
6	Health	Access to gyms or other exercise and sports facilities	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
7	Health	Life expectancy	<a href="#">ONS (UK)</a>	Life expectancy at birth – based on the average for men & women. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score. Figures are not calculated for City of London or Isles of Scilly due to small numbers of deaths and populations.
8	Health	<b>Health Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Health indicators listed above.</b>
9	Education	Access to high quality early years education	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
10	Education	Access to high quality primary education	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
11	Education	Access to high quality secondary education	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
12	Education	Access to high quality further education	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
13	Education	Pupil/Teacher ratio	<a href="#">ONS (England)</a> <a href="#">Gov.Wales (Wales)</a> <a href="#">Gov.Scot (Scotland)</a> <a href="#">Education NI (N. Ireland)</a>	Teacher Pupil Ratio – based on qualified teachers for all state-funded schools. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
14	Education	Incidence of NVQ equivalent qualification	<a href="#">Nomis (UK)</a>	Percentage of population with no NVQ-level qualification for those aged 16-64. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
15	Education	<b>Education Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Education indicators listed above.</b>
16	Housing	Extent to which housing market meets local community needs	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
17	Housing	Availability of affordable social housing	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
18	Housing	Availability of affordable starter homes	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
19	Housing	Availability of affordable rental properties	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
20	Housing	Average house prices as a % of income	House price data: <a href="#">ONS (England and Wales)</a> <a href="#">Registers of Scotland (Scotland)</a> <a href="#">NISRA (N. Ireland)</a>  Earnings data: <a href="#">ONS (UK)</a>	Mean sale house price divided by gross annual earnings. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
21	Housing	<b>Housing Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Housing indicators listed above.</b>
22	Jobs & Economic Prosperity	Overall economic prospects of my local area	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
23	Jobs & Economic Prosperity	Availability of well-paid employment	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
24	Jobs & Economic Prosperity	Access to entry level jobs	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
25	Jobs & Economic Prosperity	Access to skills and training	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
26	Jobs & Economic Prosperity	Extent to which the Local High Street meets local needs	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
27	Jobs & Economic Prosperity	GDP per capita	<a href="#">ONS (UK)</a>	GDP per person. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
28	Jobs & Economic Prosperity	Average earnings	<a href="#">ONS (UK)</a>	Mean gross annual earnings per person. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
29	Jobs & Economic Prosperity	Unemployment claimant count	<a href="#">ONS (UK)</a>	Percentage of population claiming Jobseeker's Allowance. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
30	Jobs & Economic Prosperity	<b>Jobs &amp; Economic Prosperity Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Jobs &amp; Economic Prosperity indicators listed above.</b>
31	Environment & Energy	Availability of public green spaces	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
32	Environment & Energy	Air quality	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
33	Environment & Energy	Availability of public recreational spaces	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
34	Environment & Energy	Effective use of public land	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
35	Environment & Energy	Security in public spaces	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
36	Environment & Energy	Waste disposal and waste management	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
37	Environment & Energy	Recycling services	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
38	Environment & Energy	Flood preparedness	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
39	Environment & Energy	Energy efficiency of home	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
40	Environment & Energy	EV charging points	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
41	Environment & Energy	CO2 per capita	<a href="#">Gov.UK (UK)</a>	CO2 Emissions per km2 (kt). Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
42	Environment & Energy	Renewable energy generation per household	<a href="#">Gov.UK (UK)</a>	Renewable energy generation (MWh) per household. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
43	Environment & Energy	<b>Environment &amp; Energy Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Environment &amp; Energy indicators listed above.</b>
44	Transport	Local roads	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
45	Transport	Connectivity to major roads and motorways	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
46	Transport	Affordability of local public transport	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
47	Transport	Frequency of public transport	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
48	Transport	Quality and suitability of pedestrian access / pavements	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
49	Transport	Quality and suitability of cycle lanes	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
50	Transport	Connectivity to an airport	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
51	Transport	Availability of car hailing services	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
52	Transport	Connectivity to national rail services	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
53	Transport	<b>Transport Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Transport indicators listed above.</b>
54	Digital	Reliability of mobile telephone network	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
55	Digital	Reliability of mobile internet data	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
56	Digital	Home internet speed	L&G & Cicero/amo proprietary survey data	Based on household sentiment. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
57	Digital	Access to 4G signal at home	<a href="#">Ofcom (UK)</a>	Percentage of households unable to receive access to 4G mobile data indoors from all main operators. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
58	Digital	Access to 30MBITS home broadband	<a href="#">Ofcom (UK)</a>	Percentage of households unable to receive 30Mbit/s broadband speeds. Data is standardised on a 1-100 scale – where 100 equals a positive score and one a negative score.
59	Digital	<b>Digital Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple Digital indicators listed above.</b>
60	Overall	<b>Overall Index Score</b>	<b>See notes</b>	<b>A compound measure that aggregates the multiple all indicators listed above. Each of the seven Index buckets are assigned a relative weight of importance. This is based on a statistical analysis to assess the strength of correlation between a given measure and the extent to which households feel quality of life locally is improving or worsening.</b>
